Prof. Dr. Ignatius Goldziher,

BUDAPEST

Highly esteemed Sir:-

Your post card of Sept. 28th, relative to your birth data duly received, for which I thank you. I have cast your chart which I am enclosing, and also a copy of my own. Yours is the only chart I have ever seen, outside of mine, which has the mystical degree 25 Virgo rising.

I have sent a typewritten manuscript in the English language to:

Miss Marie Corelli,
Mason Croft,
STRATFORD-ON-AVON,
England

and I have written her to forward it to you for your inspection. I would be glad indeed to have you read it and then give me a list of ancient manuscripts in Paris, Constantinopel and the Orient and other places in general, that you are acquainted with, containing matter substantiating the statements received through the Spirit Author.

When you are through with the typewritten manuscript, kindly return it to me direct. I am enclosing \$1. American to cover the forwarding charges.

Please excuse my boldness. We Americans are that way and we cannot help it.

I speak and read the German language extraordinarily well for an American, but when it comes to matters scientific, I can express my ideas much better in English than in the former language. Just write to me in German, - it suits me admirably.

I am not going into details about your natal chart, at this time, because you may not be in sympathy with my philosophy, but any questions you may desire to ask, will be cheerfully answered by me, if I am able to do so.

Again thanking you for the post card and the pleasant surprise attending the casting of your chart, I am

Most respectfully yours,

John B. Papoula
Psychical Researcher & Scientist

P.S.: - If you do not receive the manuscript within one week after you receive this letter, kindly write to Miss Corelli about it.
