Dear Dr. Lukács

Our readers have been pressing us to publish an article on "Existentialism Today." You, of course, came to mind at once as the best qualified author of such an article.

Would it be possible for you to prepare such an article for us? Or would you, perhaps, prefer to do an article on another subject?

Please be so good as to favor us with a reply as soon as you can.

MTA FIL. INT.
Lukács Arch.

Sincerely,
A. Evenitsky

Dear Professor Lukács:

Would it be possible to obtain a
chapter from your Ethik and/or a chapter
from your Aesthetik prior to their publication?

We would be happy to rely on your judgment
as to which section from your works would
be most suitable for our journal.

With warmest regards

MTA FIL. INT.
Lukács Arch

Dear Prof. Lukács :

Science & Society is planning to publish
in early 1967 a special commemorative issue on the
centenary of Das Kapital :

I know full well how overburdened you
must be. Nevertheless, I feel it would be a disgrace
if this centenary were to pass without being noted
in a fitting manner by Science & Society. May we
count on you to submit a paper for this special
issue ?

25 February 1966

Dear Dr. Lukács:

I am overjoyed that you will be able to submit a paper for our Centenary issue.

We wish to give our contributors the widest possible latitude regarding the length of the contributions. They may be as short as ten double-spaced typescript pages or as long as thirty pages - perhaps even longer.

You may wish, perhaps, to submit the chapter on Marx and let us do the work of whipping it into shape for publication. In any case, speed is essential for the issue is scheduled to appear early in 1967 which means that it should be in our hands no later than August or September 1966.

MTA FIL. INT.
Lukács Arch.

Fraternally,
A. Evenitsky,
