Dear Sir,

On the 17th and 18th December this year the University of Zagreb celebrates the 300th anniversary of its foundation.

In that remote autumn 300 years ago the Emperor Leopold gave, by a special Charter, to the Jesuits Academy in Zagreb all the rights held by the older universities in his Empire.

From that year on the higher education in Croatia has been carried out continuously in spite of the difficult circumstances, the wars, the subjection and misery.

Within the Celebration the University of Zagreb will promote to the degree of Doctor of Honours eight world famous scholars. Setting a high value to your contribution in creating the modern science and your influence upon the development of the science in our country the Senate of the University of Zagreb has the honour to elect you among them. I hope that you will accept the election.

The Promotion to the degree of Doctor of Honours will take place on the second day of the Celebration i. e. on the 18th December.

I hope, Respectable Colleague, that you will have the opportunity of participating in the Festivities rendering in that way the Celebration of the foundation of the first University on the enbattled confines of Europe in its struggle against the Ottoman advance more solemn.

Sincerely yours,

Ivan Supek

Dear Sir,

Thank you very much for your kind letter and for having accepted the honorary doctorate of the University of Zagreb.

I am extremely sorry that you could not participate in the Solemn Promotion Ceremony on the 18th December magnifying with your presence the Celebration of the 300th anniversary of the University of Zagreb.

Since the Promotion has been performed in your absence, we would very much appreciate if you could authorize someone to take in charge your diploma of the honorary doctorate and to sign on your behalf in the book of honorary doctors. You could ask a professor of the University of Zagreb to do it, or any other person you might wish to choose.

I congratulate you on this highest academic honour conferred on you by the University of Zagreb and I beg you to accept on this occasion my best wishes for the further successful scientific work and your personal happiness.

Sincerely yours,

MTA FIL. INT.
