According to the memorial I had the honor
of sending you on the subject of the Buda Mayors
very date the 21st Octr 1840 you will be aware
that the ^{works of the} Death Bridge ~~company~~ have been
lacking already nearly 2 years by ^{our} not getting
possession of the above Mayors ^{in prof time}
and I therefore then printed out to give the
Immense expense which such loss of time
~~would~~ entail on the undertaking -

Serious as ~~matter~~ the matter was
then I am afraid it is now much more
so. The Buda mayors are still I understand
in the hands of the government with little hope
of their being given up to us in time to get
even with the greatest exertion. Mr Giff

question if it will be advisable ^{to give up from 2 to 3}

of landing No 3 before No 2 is taken
~~out of the water~~ and ^{under} ~~in~~ the most favorable cir-
cumstances (- viz) that No 3 stands the test
of the increased current - I see no objection
by No 2 being in the river at the same time
I say even under the most favorable
circumstances the whole of the work will
be ~~thrust~~ thrown out of their proper order

can be safely applied - and - as

a necessary consequence the
of the country will be postponed for
three or four years beyond the time
originally contemplated - on the
other hand if the work on the Baden line
are suspended altogether the interest
on the capital already expended in the
receiving preparation will be entirely
lost and must be added to the above

It should give my memorandum of
the 20 Oct. 1840 you have already
incurred a heavy loss which you will find
more deeply on the work prepared and
if you have not ^{got possession} of the ~~the papers~~
by the time you get this which then will

Dear Sir

This above would be which you ought to write to the
Baron as soon as possible and which I think, may be very
useful in several respects. Add anything to strengthen it you
can think of and if it seem proper to you and please to pre-
date your letter to the Baron for the 1st of January
1842 and to put it in an extra-cover, lest the post-man
should betray the proceeding.

I take the liberty to remind you of being so good
as to procure me some Bills of Parliament for Rail roads,
about which I requested you lately through the medium
of Adam Clark, and bring them out along with
you if it there will be no sooner good opportunity
I shall be very glad to see you my dear Clark Yours very faithfully

My Dear Clark -

We have not got the India Magazine yet, #. ~~but~~
Now I begin ^{however} to be confident that we shall ~~really~~ ^{really} obtain them ~~in their present~~ in a short time. Gracious

Heaven ... what extraordinary endurance and
stomach one must have, not to be
continually sick, by seeing how slow
every thing is done in ~~our~~ ^{this} Country -

I am rather ashamed of ~~it~~ ^{of it} - ~~you~~
knows - ~~but~~ ^{the fault,} as you know
but, ~~the~~ ^{is not mine} ~~cause of it~~ - ~~whether~~

About the end of last year

the fish, ~~but it was~~
the magazines and ~~the~~
is the reason as they
Duron informed you ^{of it} ~~at~~
that time; but it slipped
out again of our hands
Henry Clark

you can begin next spring with Coffedam

N^o 4, or most of swallow the
black pills, and begin with N^o

3 I don't know ... as far as I

can judge ... it will not be possible

to get the India Store in

proper order in time, ... to lay

hands on N^o 4 ... and if indeed

the Coffedam N^o 3 should

precede the N^o 4 ... how the

expense, delay and risk will

be augmented. It is indeed im-

possible ~~in~~ ⁱⁿ our government

to protect us so little, - or at
all events - so slow - ~~I think~~
... we should get paid for it all
what to be done. ... ~~some~~ ^{some} ~~said~~

Printed in
London

In my opinion nothing ~~else~~ ^{but} as to endime, take
patience, - and get -- if possible -- one paid,
for all ~~the~~ ^{the} regulations, risk and loss of time,
with which we have been honored. ---
There is no doubt ~~that~~ ^{concerning these questions} there will be one
alacuit between our Company and the government.

Let us ~~let~~ lay .. in time -- a good foundation
~~for~~ ^{according to this - in my humble opinion}
to it. # you should write to the Baron

as soon as can be ... a note to this effect:

is one of a still more serious nature,

As the things stand now it seems to me that
in the best case, viz. if we get the Magazines

for framing the original plan of the series
of works and ~~therefore~~ ^{that is the reason} did you give, I
think ^{they have already} ~~to~~ ^{the instructions} ~~begin~~ ^{to begin} Copper

If it will not be hurt at all, the loss of time is already immense ~~for~~ ^{for} having been
prevented ~~to~~ ^{to} ~~begin~~ ^{begin} the works at the place where

 I have sent you in the course of the packet a copy of the
 following as well as myself to see
 the best way of the course of the packet to see
 in the best way.

We may think of doubling our power of production by getting a
 further steam engine and greatly increasing I would beg you will give the
 the works of the bridge and the low engine of the same construction
 as each of the fine manufactures in Lyons.

My dear Clark

Hurrah, hurrah! The Magazines are
ours! We are ~~so far~~ in possession of them,
it is to say
~~that~~ we may, put our hands to them
any moment! Adam begins, to make
& -! Well, it was hard work -- but
endure and time brought us yet
to a happy conclusion. -- You know
all this ~~at this time~~ ^{at this time} I don't doubt, -- as the
Baron seems to be quite glorios of
the event, -- and ^{he} acquainted you with
it ^{by} at this time. Now as we lost
a great deal of time, we ought to
make it up any how. Hungarian
Life is short, ... and we want to
merry things yet in Hungary --
Kisger, water and rail road & &
We ought to push on and keep
moving. -- I have got the pleasure
of seeing ^{quite finished} out of my window two Coffers
dams playing with their engines
& N^o. 3 Cofferdam in its birth
growing every day a little -- the
Magazines looking quite melancholy,
as they seem to feel already --
~~very sad~~, that they are going to
be blown up, in a little less than
no time" & I all this forms

Old Palatin
10 years. --
1847 through

a delicious view indeed --- it does me us,
to my Country -- who was rather unwell
for a length of time, -- and me, particularly
to my liver, ... a great deal of good,
yet -- yet, there is a thing ... which
makes me, in the midst of this delicious
enjoyment, -- rather uneasy, -- and ~~that~~ ^{it}
is, -- I must confess the old Palatine
or, better to say, his sarcastic doubtfulness
that we shall hang about ~~yet~~ 9 or 10 years ^{more}
before we ~~may~~ may pass, on your everlasting
triumphal Arch! -- Now pray dear Clark
and you are just the fit person ^{for this purpose}
show him that Old England can, which he
-- the unfortunate Prince -- never saw, never
understand to appreciate & & & -- nothing
would advance my purposes more -- than
to convince my Country men, in every thing
and especially in one of ^{so} great a magnitude,
that I had right, to show them Old England
to be as the best, ^{as the} only pattern, they can
struggle after! -- We ought ^{to take a walk}
over the bridge in the autumn ¹⁸⁴⁷ -- and
^{to attain this we ought} to begin in the course of the present year --
The Opera House No IV too!! -- If I
was a professional man -- you may depend

K 193/124 II

J. Clark C Dear Clark, -- I ^{should} would not be awkward
enough, -- to talk such -- probably
nothing but nonsense to you --
But as I am ^{entirely} a profane, and am not
^{quite} Cap, to see the difficulties of
the job, -- you will take this few
lines, merely as ~~an~~ a 'Womenly'
outbreak of an ardent desire. --

Now I ^{come} to the mill.
I take my ^{incessant} thanks Dear Clark
for the time you devoted already
to the ~~many~~ of this undertaking of
mine. -- Quite betwixt us, I am yet
very sorry that our Beth Mill is
not on an English principle. You
know best, with what difficulties
I am to struggle here, -- and that
I am no idler. I could not find
the capital. There came a Tyroler
house with $\frac{m}{15}$ L. forward --- it
was comparatively light work to join
him, -- and that's ^{our} this is the
key stone of the Cylinder Mill.
The expense of grinding is very
great -- but as the ^{our} flower
reproduce is better than any thing
in this Country, and we may improve

At yet by making a better choice of wheat -
and as ~~over~~ ^{the} mills in this country are quite
antidiluvian ... perhaps we shall make
milled and make after all a good job of it
Our Director Mr Febr, a capital Straits
forward sort of German, was ~~very~~ ^{uncommonly}
flattered, - and in all our and exertion to
make the thing succeed - that you gave
us so favorable an account of our flour
Now as to the estimates you sent me,
I could not come to any conclusion yet -
You know, how slow every thing goes in
this country and how I am opposed ~~for~~
ⁱⁿ the least trifling. I cannot take ~~any~~
responsibility on my back - we must
consult and quarrel about it yet -
You will explain this to Messrs Miller &
lest they would think, it was nothing
more than a matter of curiosity to have
their tender. -

And now tell me, how you are, when
do you think to come ~~and see us~~ ^{to} ~~see us~~
lay down the foundation stone of the
bridge, and see us -
My Cousins and Daughters - who are going
to stay the greater part of the summer here, ~~will~~ ^{will} be
remembered to you. In a fortnight I go to Ossora
to inspect the works there - How happy I would be
if you were to see all this this month

There is another thing I wanted
to communicate to you long ago. - Allow
me to do it ^{now} in a few words. - There is
an ^{land} appropriator of Leith, who ^{has} got a very
rich coal mine. - He is willing to form
a company. He will give the mine, and
to ascertain amount my
other - perhaps ^{at least} I
shall come forward with
humble person of the capital, at third
his knowledge, a fourth his time
& L - and we ^{should} divide the
profits. The coal is the same -
you took with you, capital for
making ^{gas} gas. The quantity seems to
be inexhaustible. The question is -
in my opinion - how to create
a great demand, - as the profits
could not be of any consequence, &

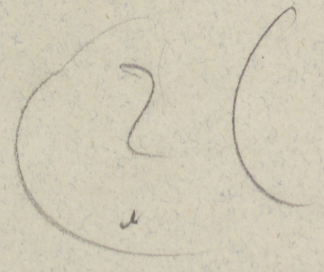

except the demand is ^{being} ^{not} great. Well, but the
consumption of coal fuel is in general very ^{in this country}
^{extremely} limited, the supply ^{very} easy -- as we
have got yet ^{of the} greater extension,
the only way, of creating a ^{greater} demand is then
to ~~and~~ introduce the applications of Gaslight
and of establishing Ironworks. But as to
the gas, competition would be very great, as
they find coals everywhere, and hence the
price of it ^{would} ^{be} brought to a very low level, where as
the competition would be almost none in establishing
ironworks, -- here, -- as a greater capital is
wanted, we ^{should} ~~would~~ be left for a long time
in the ^{main} ~~main~~ ^{point} ~~point~~ ^{is} ~~is~~ the ^{main} ~~main~~ ^{point}
of the job -- if we take a proper
start. The question is -- whether the coals of mention
... which will not be converted in coals -- can be used
for ironworks, whether there is iron ore ^{to} ~~to~~
be found in proper places, where ~~they may~~ ^{they may} be got at
easily, -- and ^{at last} how it stands with the ^{locality} ~~locality~~ ^{means}
of bringing the produce to market. -- Well, I do not
know all this, but so much I know, -- that
it would be well worth ^{at least} ~~at least~~ to take all this in
a nearer consideration, ^{in order to} ~~and~~ ascertain the ~~how~~
with some accuracy, -- what ought to be done

 find

pleasure in ^{it} ~~the~~, but we must have every
thing done properly. We want good paints. Now
if you were so kind, as to send us out, ^{Cent} ~~two~~ hundred weights
of patent green --- under the ^{direction} name of the
Baron, but addressed to Allark - at Leeds,
you would oblige us all very much - indeed.

The second favour I ask is -- (again one
or two Mills. You had the kindness to send
me the Lord's ^{inimical} Railway Mill. I should

be most thankful --- if you could send me

the ^{Catholic Emancipation and the Bill of Sir Robert Peel} ~~of~~ ^{very good} ~~one~~ ^{of them}
By the bye I almost forget to tell

you, that ^{my Daughter} our Caroline marries a Mr
Festini, who was several times in England

with C. A. Eddy. He is an accomplished

Gentleman, -- of one of our first families

very good figure, and ^{very handsome} ~~handsome~~ fortune #

It is not declared yet, but shall be in a few days --

I ^{should} wish ... their marriage day to be fixed

some about the 20 of August -- in order that

the foundation stone ^{of} the bridge ~~should be~~

to the foundation stone of my & getting Grand

papa ^{might} should be laid at once --- &

My Countess & Caroline Maria Pula, all ^{with} ~~will~~

to be remembered to you ... and hope you will
be with us, a long time before the 20 of August --

Has got a very good
house here, and a very
comfortable country seat -- very
near from here. ^{the (Edinburgh)}

Dear Clark

Novemb. - 16 17
19 1842

I beg your pardon for having delayed
along with my answer to yours from of
the 24th Octob. - But I was so unusually
overwhelmed with all ^{sorts of} business -- and wondering
from one thing to another everlastingly
sitting, that I could indeed not dispose
of a single minute to tell you, that
we, my family and I, we are all very
well, and feel very happy to hear
that you had a good passage and enjoy
good health too. - I did not receive
yet Sir Roberts Diet, Mill, the
columns, and the essay on the
Sanitary Conditions & yet, which
you are so kind to announce...

But I think ... all that must
be arrived - at Vienna, - and is not
here yet

Now dear Clark, allow me to tell you
my but thanks -- you are indeed so
kind so amiable, that I don't find words
to express all that I feel for you. -
The information of the ^{eventual} improvement
of ~~our~~ ^{the boilers of} our flour mill, which
continues always in pretty good
going - will very well, come -
I thought that myself that
Mr Turnbells - passage will turn
out a success -- and I am sorry
I gave you the trouble - but if it
was the desire of my Country -- in

I know your health, good & happy
and believe me very truly
yours

I wish you
would write to
send me

to tell you
kindly
candidly

W. J. Clark London

Perth, the 6th
December
1842

My dear Sir,

The Count Strickonyi
duly received your kind letter of
Nov. 11th; but being himself
quite overwhelmed again by a
series of meetings and sittings
partly here partly at Pressburg
he charged me, ~~to~~ in the first
instance to thank you in his
own and His Maj. Highness's
name for the ~~information~~
you had ~~been~~ ^{of} the goodness to
procure and so give about the
Fire Engine; — and in the
second place to request you
to ~~have~~ be so kind as to
order one Fire Engine of the
description recommended by you
viz. one made on the most approved
plan, capable of throwing water 120ft
high mounted on Springs with driving
seat and wrought iron wheels,
whose cost is £ 129. 0. 0.

Further one length of 40ft of
leather Hoop pipe copper
riveted with Gun metal
joining screws

to be sent out by Trieste as the
works ~~depart~~ ^{addressed to the care}
by Mr. Knecht to Trieste as the charger

[and having moreover
a cold eye]

way, to ^{our} the usual house ~~banker~~ house there
"Ambrogio di Stefano Rally" and from
Trieste to be transported directly (not
through Vienna) ~~to~~ here to. Both under
the direction of the Suspension Bridge
Company. - Let the expenses be paid for our
account by Gen. Hays will reimburse
them ~~as here~~. And as machines of new invention and of unknown
form are free of duty in Australia,
it will be in order
to save some
pounds it will
be good if
Mr. Keuff
discharge the
Tax Engine
in his Commissi-
ment as a
machine of
newest inven-
tion or improve-
ment.

S. Clark wrote two letters
to you, which you must have
received in the mean time.
In the Dam No 1 the water
is let in already the works
on the other points are going
on regularly - Dam No 4
is very nearly finished, but
I sincerely hope, your continued
to be quite well, with the best wishes
for ^{it} ~~your~~ ~~health~~ I remain
My dear Sir, Yours very faithfully

#

The Count Scherzinger will be also
very much obliged by your ^{kind} sending
out ~~with~~ with the first good
opportunity, 2 pounds of the
Prince Schwartzenberg's Mixture
again for his account
