Dear Professor,

I am an assistant of the Institute of Sociology of Milain, where I am occupying with the sociological problems of East Countries, and at the present time, I am interested in the problems of the "Wissensoziologie" and in the sociology of the literature. I like very much their literary works which I have read in italian language and which I also reviewed for our review " Studi di Sociologia ".

Coming to Budapest at the end of next august, I shall be very pleased if You allowed me a conversation to have, from You, some further informations about their last works and in particular for all which concerns the sociology of the literature. If You will be so kind to allow me this conversation, I shall pray You to communicate it at this adress:

Yours Faithfully
